OUTDOOR TEMP/HUMIDITY DEVICE (LAN-WMBUS-O-TH)
HARSH TEMP/HUMIDITY DEVICE (LAN-WMBUS-O-TH-H)

Verify correct device and version

This document applies to the device LAN-WMBUS-O-TH with protocol version 60 and LAN-WMBUS-O-TH-H with protocol version 70. There are two ways of finding out the protocol version of the device; either by looking at the label on the device or by looking at the data packets sent out by the device. See chapters **Protocol version in data packets** and **Protocol version in label** below for more information.

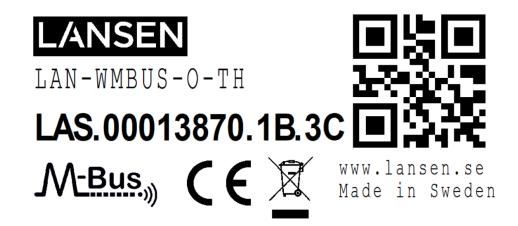

Protocol version in data packets

If it is possible to check the information in the data packets sent out by the device, then the protocol version is included in the data field called *A-Field Protocol version*. For more information, see chapter **WMBUS-format**.

Protocol version in label

The protocol version can be found on the label. An example of a label is shown in the figure below and the relevant information is described by LAS.00013870.1B.3C, where

- Manufacturer code: LAS
- Serial number: 00013870
- Device type: 1B
- Protocol version: 3C for O-TH and 46 for O-TH-H
